HTML code for the slider C:/Users/black/Desktop/TRANSITO/wowslider.html

How to add this slider to HTML page

1   **Upload these folders to your server**

```
data1/
engine1/
```

Current location: C:/Users/black/Desktop/TRANSITO.
These folders should be located in the same folder as your html page

2   **Paste this code to your page between the tags** `<head></head>`

```
<!-- Start WOWSlider.com HEAD section -->
<link rel="stylesheet" type="text/css" href="engine1/style.css" />
<script type="text/javascript" src="engine1/jquery.js"></script>
<!-- End WOWSlider.com HEAD section -->
```

3   **Paste this code to your page between the tags** `<body></body>` **in the place that you want the slider to appear**

```
<!-- Start WOWSlider.com BODY section -->
<div id="wowslider-container1">
<div class="ws_images"><ul>
                <li><a href="http://wowslider.net"><img src="data1/images/0004.jpg" alt="html5
slider" title="0004" id="wows1_0"/></a></li>
                <li><img src="data1/images/publici.jpg" alt="publici" title="publici"
id="wows1_1"/></li>
        </ul></div>
<div class="ws_script" style="position:absolute;left:-99%"><a
href="http://wowslider.net">bootstrap carousel</a> by WOWSlider.com v8.8</div>
<div class="ws_shadow"></div>
</div>
<script type="text/javascript" src="engine1/wowslider.js"></script>
<script type="text/javascript" src="engine1/script.js"></script>
<!-- End WOWSlider.com BODY section -->
```

Also you can try the <u>Insert-To-Page wizard</u>, to add the slider visually, without touching the code!

<u>Click here</u> for the detailed info.
